2022 • 207 pages • Illustrated • Retail Price: \$69.99

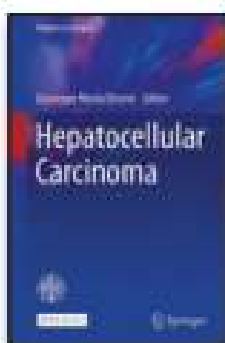

DIVATIA, OZCAN, GUO, ET AL.

Kidney Cancer: Recent Advances in Surgical and Molecular Pathology, eBook*

ISBN: 978-3-030-28333-9

This resource provides a comprehensive overview of pathology of kidney tumors along with radiological features and treatment strategies. This text also serves as a resource for the medical or surgical practice while preparing for examinations or maintenance of certification. Chapters contain a review of important pathologic parameters for diagnosis and reporting, with emphasis on information regarding developments in this field.

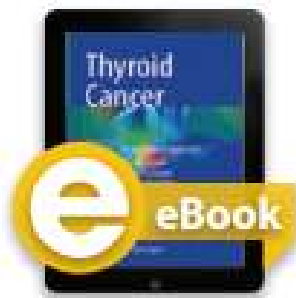

ETTORRE

Hepatocellular Carcinoma

ISBN: 978-3-031-09370-8

This resource offers a comprehensive review of hepatocellular carcinoma (HCC) with a particular focus on the pathobiology and clinical aspects of the disease, including diagnosis and treatment. The book is organized into four parts – overview, diagnosis, management strategies, and recommendations – and aims to provide surgeons and clinicians with a valuable resource for complete and up-to-date research on the clinical aspects and management of HCC.

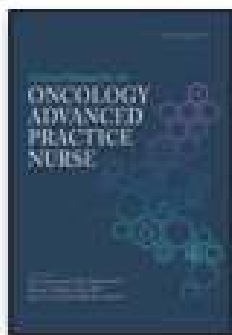

GRANI, COOPER, AND DURANTE

Thyroid Cancer: A Case-Based Approach, 2nd Edition, 12-Month Access, eBook*

ISBN: 015-0099

Available as a 12-month access eBook, this text utilizes clinical case material and presents the diagnosis and treatment of thyroid cancer and related clinical issues that provides clinicians in endocrinology and oncology with the best real-world strategies to properly manage the various manifestations of thyroid cancer that they may encounter. Each chapter is a case report that opens with a unique clinical presentation, followed by a description of the diagnosis, assessment, and therapy, as well as the case outcome, literature review, clinical pearls and pitfalls, and bibliography. All recommendations are based on evidence-based clinical practice guidelines and recent literature.

Nurse Practitioner/Physician Assistant Book Selections:

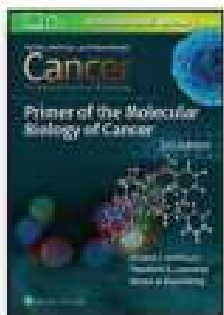

CAMP-SORRELL, HAWKINS, AND COPE

Clinical Manual for the Oncology Advanced Practice Nurse, 4th Edition

ISBN: 978-1-63593-045-0

This resource is a guide for this growing profession on the best care for patients with cancer who present with acute and chronic medical issues. This manual is an important resource to guide nursing professionals, with each chapter presenting an outline format that is extensively cross-referenced to allow easy identification of symptoms to determine a medical diagnosis. This text includes tables, figures, and appendices that offer quick access to information on topics important to the advanced practice landscape.

DEVITA, LAWRENCE, AND ROSENBERG

Cancer: Principles and Practice of Oncology Primer of Molecular Biology in Cancer, 3rd Edition

ISBN: 978-1-975149-11-6

This reference on the molecular biology of cancer compiles the knowledge and experience of leading scientists and clinicians in the field. Chapters on each of the 18 most common cancer types are included, with state-of-the-art information on how molecular biology advances are impacting clinical practice.

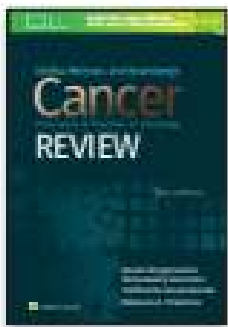

KARP, FALCHOOK, AND LIM

Handbook of Targeted Cancer Therapy and Immunotherapy, 3rd Edition

ISBN: 978-1-975179-24-3

Designed for quick, everyday reference, *Handbook of Targeted Cancer Therapy and Immunotherapy, 3rd Edition*, includes clinical trial results of more than 250 targeted therapy and immunotherapy agents, providing a practical, intuitive, colorful overview of this rapidly advancing field. This handbook presents information distilled by dozens of translational research clinicians and other healthcare experts with hundreds of years of cumulative experience in the revolutionary area of genomically based precision oncology.

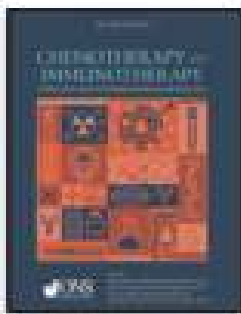

MORGENSZTERN, GOVINDAN, DEVARAKONDA, ET AL.

DeVita, Hellman, and Rosenberg's Cancer Principles & Practice of Oncology Review, 5th Edition

ISBN: 978-1-975151-88-1

This comprehensive review text covers the entire specialty of oncology, including expanded coverage of molecular biology, epidemiology and etiology, screen and prevention, genetics, clinical trials, and immunotherapy. Readers will discover hundreds of multiple-choice and case-based questions, along with detailed answers and explanations to help explain the how and why behind each correct response. Material on all aspects of oncology, including medical, radiation, and surgical oncology, as well as hematology/oncology issues, are discussed.

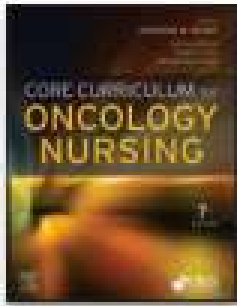

OLSEN, LEFEBVRE, WALKER, ET AL.

Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice, 2nd Edition

ISBN: 978-1-63593-055-9

This text is a go-to resource for evidence-based guidelines and education on chemotherapy administration and side effect management. This completely revised and updated text expands the foundational information clinicians can rely on for practice to include the latest advances related to nursing care of patients receiving antineoplastic therapies. This text features 26 chapters examining multiple categories of cancer-care agents, including chemo, immunotherapy, molecularly targeted agents, and hormone therapy. It includes topics such as pathophysiology and management of toxicities related to antineoplastic treatment, with evidence-based guidelines; comprehensive drug tables in each chapter; and new and updated figures, tables, and much more.

Nursing Book Selections:

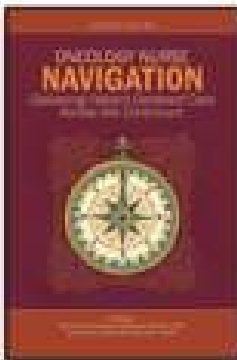

BRANT

Core Curriculum for Oncology Nursing, 7th Edition

ISBN: 978-0-323-93051-2

This resource was edited by a team of oncology nursing experts and is designed for the specialty of oncology nursing, and developed in collaboration with the Oncology Nursing Society. Organized to follow the OCN® Exam blueprint, this book covers the scope of oncology nursing, including screening and the continuum of cancer care, the scientific basis for practice, types of cancer, treatment modalities, palliation of symptoms, and cultural and spiritual care.

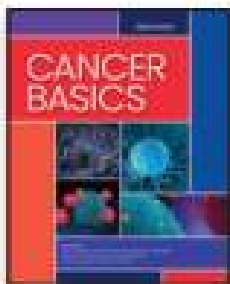

CHRISTENSEN AND CANTRIL

Oncology Nurse Navigation: Delivering Patient-Centered Care Across the Continuum, 2nd Edition

ISBN: 978-1-63593-034-4

This resource provides an overview of the role of the nurse navigator in cancer care and outlines the development of a navigation program, the skills and training needed to work as a nurse navigator, methods to evaluate outcomes, and issues related to assisting patients with specific types of cancers. Topics discussed include partnering with patients and families to keep them informed, facilitating shared decision making, effectively addressing any barriers to care, providing pertinent education, and managing patient expectations.

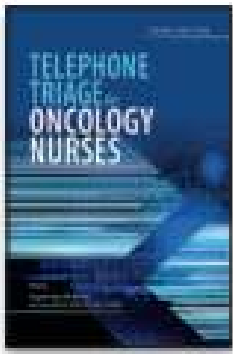

EGGERT, BYAR, AND PARKS

Cancer Basics, 3rd Edition

ISBN: 978-1-63593-051-1

The *Cancer Basics* book series was developed to offer fundamentals of cancer and its treatment to recently graduated and experienced nurses looking for professional growth and knowledge in their oncology specialty. It has added symptom management and survivorship basics using the most state-of-the-science and evidence-based content for a more comprehensive review. All content has been updated to provide a more reader- and learner-friendly product that will appeal to a broader audience of oncology and non-oncology professionals.

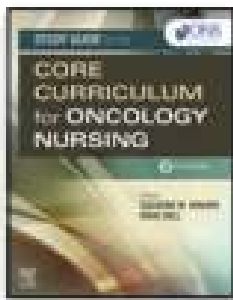

HICKEY AND NEWTON

Telephone Triage for Oncology Nurses, 3rd Edition

ISBN: 978-1-63593-026-9

This resource gives a look at telephone triage, including insights into patient care needs that result from cancer treatments, such as targeted and immunotherapies, as well as how technologies, including smartphones and Internet communication platforms, have enhanced patient assessment. This edition includes chapters on nursing management of oral therapies and updated protocols using policies and evidence-based practice.

MAHON AND BELL

Study Guide for the Core Curriculum for Oncology Nursing, 6th Edition

ISBN: 978-0-323-59546-9

This definitive study guide endorsed by the Oncology Nursing Society covers the entire scope of practice for oncology nursing. Practice questions match the format and makeup of the OCN® Exam and reflect important changes in cancer treatment and nursing care.

Pharmacy Book Selections:

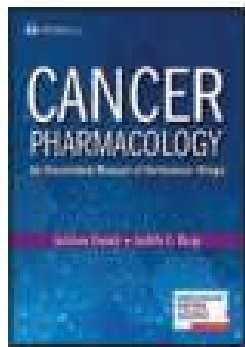

BRAGALONE

Drug Information Handbook for Oncology, 17th Edition

ISBN: 978-1-59195-390-6

This handbook provides information on antineoplastic agents, ancillary medications, combination chemotherapy regimens, and dosing protocols. Oncology drug monographs contain concise fields of pharmacology detail, including a combination regimens field in specific monographs that provides references to applicable chemotherapy regimens. There is also a special topics section that reviews cancer-related issues, such as the management of EGFR inhibitor toxicities; dermatology, ophthalmology, and gastroenterology; venous thromboembolism in the cancer patient; chronic (cancer) pain management; hospice (end of life) care; palliative care medicine; hematopoietic stem cell transplantation; management of infections; safe handling of hazardous drugs; and emetogenic potential of antineoplastic agents in children. The Appendix also adds valuable information on conversions, renal function tests, comparative drug charts, and laboratory reference values for adults.

EMADI AND KARP

Cancer Pharmacology: An Illustrated Manual of Anticancer Drugs

ISBN: 978-0-8261-6203-8

This resource is a guide to the essential basic and clinical science of all the effective, life-prolonging drug therapies in oncology. This book covers topics from traditional cytotoxic agents to targeted genomic, epigenomic, hormonal, and immunotherapeutic agents and the advances in cancer pharmacology that are new standards of care for common and uncommon malignancies. This highly visual text uses a uniform approach to each cancer drug class and agent presented in the book.

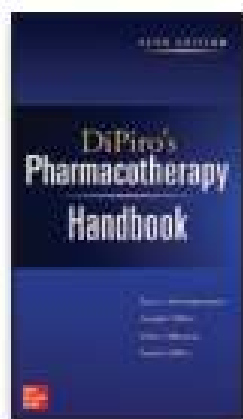

NAGAPPA, KANOUIA, BHATT, ET AL.

Perspectives in Pharmacy Practice: Trends in Pharmaceutical Care, 12-Month Access, eBook*

ISBN: 978-981-16-9213-0

Available as a 12-month access eBook, this resource presents a contemporary view of pharmacy practice research covering theories, methodologies, models, and techniques that are applicable. The initial chapters describe the basics of pharmacy profession and what is the key role and responsibilities of the pharmacist in health-care delivery. The central part of the book illustrates the community, hospital, and ethics regarding drug formulation. The last chapters cover the therapeutic aspect of pharmacy and how these can be employed to improve patients' health-care facilities.

SCHWINGHAMMER, DIPIRO, ELLINGROD, ET AL.

DiPiro's Pharmacotherapy Handbook, 12th Edition

ISBN: 978-1-264-27791-9

This text covers 140+ diseases and disorders most commonly encountered in a clinical setting. Each chapter is organized into different sections such as disease state definition, pathophysiology, clinical presentation, diagnosis, treatment, and evaluation of therapeutic outcomes. Providing a thorough understanding about what drugs to use and why, this unmatched guide includes flowcharts, tables, and charts; provides JNC-VI drug therapy and pharmaceutical care guidelines; and offers concise chapter summaries that save precious study time.
